

Dynamic Balance System - DBS™

YOUR Rehabilitation Exercise

PROFIT CENTER

Even Minimal Use pays for *your* DBS

--Liam Heavin, Chartered Physiotherapist

DBC Ireland, Dublin, Ireland

*"Visual and audio feedback are key to any proprioceptive or rehabilitation program, particularly when dealing with injuries to the lower limb. The **DBS** has allowed me to provide a functional end-stage rehab program; building stability, control and dynamic strength quicker than any tool I have previously experienced. This system builds stability by providing that vital patient feedback. For faster responses to balance and proprioception rehab, the **DBS** is it."*

--Jeff Banaszak, PT, CSCS

President, Back9Fitness, Inc

*"No rehabilitation, fitness or performance center specializing in golf should be without the **Dynamic Balance System-DBS**. We use it to assure that results gained in the gym are taken directly out to the course!"*

The advanced teaching capabilities of the DBS will
INCREASE your income !

For example, insurance reimbursement for Exercise Performance with only:

- 3 clients/day, 5 days/wk for Neuromuscular Re-ed or Therapeutic Ex @ \$15/session = \$225/wk
- 4 clients/month for Biofeedback @ \$40/session

Extra Income: \$1,060 / mo = \$12,700 / yr

The DBS and training available from \$6,995
